

To Whom It May Concern,I want to strongly object to the National Association of Broadcasters from stifling XM's ability to give the public the information and services they require and pay for. It is our right as paying customers of XM radio to be provided this service, and it would be a great disservice to take this away from listeners. XM provides its listeners with quality that is not available through regular FM stations. I rely on XM weather and traffic in the morning to get me through my day. Not everyone has the luxury of turning the television on in the morning, and XM provides me the information I need as far as what route to take to work, or how the weather will effect my day. I urge you to continue to allow XM to provide the service and quality it is known for. DO NOT TAKE XM's ABILITY TO PROVIDE WHAT THE FIRST AMENDMENT HAS ALLOWED FOR, ALL THESE YEARS!!!
